

General Information

White Rock Lawn and Yard Care provides recurring lawn and garden maintenance for residential, strata and commercial properties in White Rock, South Surrey, Surrey and Langley. Our services are tailored to the needs of each property and may include lawn maintenance, garden bed care, shrub and hedge trimming, lawn rejuvenation and other seasonal services. Recurring maintenance is available through our customizable Bronze through Diamond Service Packages. Please see our Service Packages document for package details.

How Our Service Works:

Each property is assessed according to its landscape characteristics, service requirements and desired level of care. We then recommend an appropriate scope and Service Package, with seasonal priorities adjusted throughout the year as required.

Lawn Rejuvenation:

Lawn rejuvenation services may include aeration, dethatching, fertilization, liming, top-dressing, overseeding, spot repairs, weed control and biological chafer beetle treatments. Services are recommended according to lawn condition, seasonality and budget, with the goal of progressively improving lawn health and appearance.

Individual Services:

We also provide one-time services outside of our recurring Service Packages. These may include storm cleanups, restoration of overgrown gardens, shrub and hedge trimming, garden bed cleanups, lawn rejuvenation, bark mulch or garden soil applications, seasonal planting, leaf cleanup and pruning of non-city trees under 15'.

Garden Waste:

Garden waste generated through our services is handled according to the property and agreed service scope. Where appropriate, material may be placed in approved garden-waste bags or green bins for municipal collection, while off-site removal is included or arranged where required.
